RALPH LAURENZ CUNANAN TIMBOL

timbolralphlaurenz@gmail.com | +63 921-578-1684 | linkedin.com/in/ralph-laurenz-timbol | Pampanga, Philippines

PROFILE SUMMARY

Detail-oriented Computer Engineering graduate with hands-on experience in full-stack development and software quality assurance. Proficient in building web applications with modern technologies like Next.js, TypeScript, and PostgreSQL, and experienced in manual and automated testing using Playwright, aiming to contribute to high-quality software development.

WORK EXPERIENCE

Full Stack Developer (Part-time) **September 2026 – Present**

DE Webnet Solution *Remote*

- Developed and maintained full-stack web applications for multiple clients using Next.js, TypeScript, PostgreSQL, and Prisma, delivering production-ready systems against approved technical specifications
- Implemented role-based access control, multi-tenant data isolation, and append-only audit logging across client systems, ensuring secure and compliant data handling for each organization served
- Engineered authentication, scheduling, records management, and reporting modules, converting business requirements into functional features.
- Wrote and maintained extensive automated testing suites, including unit, integration, and browser-level tests, improving system reliability and reducing pre-release issues.

Associate SQA Engineer Trainee **January 2026 – April 2026**

Cloudstaff Philippines Inc. *Angeles City, Pampanga*

- Conducted comprehensive manual testing of application features, documenting defects with detailed reproduction steps to facilitate prompt resolution.
- Developed and executed automated end-to-end test scripts using Playwright, increasing regression test coverage and efficiency.
- Designed and maintained structured test cases and test documentation aligned with acceptance criteria and project requirements.
- Participated in agile ceremonies, enhancing communication and collaboration within the cross-functional teams.

RECENT PROJECTS

HealthOS – Multi-Module Healthcare Operations System **September 2026**

- Built a multi-module healthcare operations system using Next.js, TypeScript, PostgreSQL, and Prisma covering patient management, appointment scheduling, clinical records, billing, laboratory, pharmacy, and insurance claims, resulting in a role-based, audit-logged platform, with end-to-end tests written in Playwright.

Student Arrival & Departure Notification System **September 2026**

- Built a student arrival and departure notification system using React, TypeScript, and Node.js, enabling staff to log gate events and automatically derive real-time campus status, resulting in secure Web Push alerts and role-based dashboards for admins, staff, parents, and students, with end-to-end tests written in Playwright.

DE Atlas – Knowledge Base Platform **September 2026**

- Built a multi-tenant knowledge-based platform using Next.js, TypeScript, Prisma, and PostgreSQL, implementing staleness-weighted search ranking, a Change Request review-and-merge workflow, and automated Living FAQ generation from search gaps, resulting in a system where every tenant's data stays fully isolated and no content reaches production without review, with end-to-end tests written in Playwright.

KITA – Bookkeeping SaaS **August 2026**

- Built a multi-tenant bookkeeping SaaS platform using Next.js, Prisma, and PostgreSQL, featuring role-based access control across three tiers, full per-tenant data isolation, a structured ledger with postable/reversible entries, automated financial reports, an audit log, and AI-assisted receipt scanning, with end-to-end tests written in Playwright.

TALA – Job Application Pipeline Manager **April 2026**

- Built a full-stack job application tracking system using Next.js and PostgreSQL, featuring a drag-and-drop Kanban pipeline board, interview scheduling, recruiter contact management, application statistics dashboard, and JWT-based authentication, with end-to-end tests written in Playwright.

IoT-Based Beehive Monitoring and Feedback System **October 2025 – March 2026**

- Built and deployed a full-stack web application on Hostinger using PHP and MySQL, incorporating frontend development, REST APIs, CRUD operations, ESP32 real-time data integration, IoT hardware assembly, and solar-battery power supply.

EDUCATION

TERTIARY

System Plus College Foundation – GPA: 1.34 **S.Y. 2022 – 2026**

Bachelor of Science in Computer Engineering *Angeles City, Pampanga*

TECHNICAL SKILLS

Programming & Scripting: Python, JavaScript, TypeScript, Assembly Language, C/C++

Web Development: Next.js, React, TypeScript, Tailwind CSS, PHP, REST APIs, Responsive Web Development

Backend & Databases: Node.js, Prisma ORM, PostgreSQL, MySQL, RESTful API Design, Multi-Tenant Architecture

Software Testing & QA: Manual Testing, Playwright Automation, Test Case Design, Bug Reporting, Agile/Scrum

Tools & DevOps: Docker, Git, Github, CI/CD Basics
